

Data Driven Dairy Decisions for Farmers 4D4F presents Tomorrows precision livestock farming today Free webinar with leading dairy experts and farmers

Time: 14.00–15.00 (CET) November 21, 2018

Live webinar – webcast on www.4d4f.eu or on Facebook page 4D4F EU project.

Modern livestock farming aims at optimizing animal welfare in combination with high productivity. Modern technology and development of new and improved tools for monitoring behaviour and health of individual animals and herds open up for high precision in prevention of disease and illness. Improved decision support systems are introduced with the help of sensors and data harvesting.

In the Horizon 2020-funded project Data Driven Dairy Decisions for Farmers – 4D4F – farmers, farm advisors, technology suppliers, knowledge exchange professionals and researchers have created a European **Community of Practice (COP)** where they exchange knowledge and experience and collected and communicate best practices.

To sum up, we will present some of the results and experiences on an open webinar on November 21. The concept of warehouse of technology will be lifted, as well an example of the standard operation procedures for the using the new technology. A Dutch dairy farmer in Sweden will give his view on how data driven decision support improves the precision in his production.

Registration: No registration is necessary. The webinar will be accessed via [this link](#), meeting number 955 082 668, password: AgPyKCJs. For tablet or mobile, download app here: [Android](#) or [iOS](#).

The webinar will also be broadcasted on the projects page on Facebook, **4D4F EU project**.

More information is available on the projects website www.4d4f.eu.

Duration: 60 min.

Program:

<i>Time</i>		<i>Speaker</i>
14.00	Introduction, presentation of 4D4F	Richard Lloyd, IfA
14.10	Warehouse of Technology	Kristine Piccart, ILVO
14.15	Standard Operation Procedures in Herd Navigator	Annica Hansson, KSLA
14.25	4D in practice	Klaas Jellema, Swedish dairy farmer
14.35	Practical aspects of combining two technologies to revolutionise the treatment of lameness	Richard Lloyd, IfA
14.45	Presentation of Winner of 4D4F COP Award	
14.50	The future of 4D4F Community of practice	Richard Lloyd, IfA

It will be possible to ask questions during the webinar through the meeting room chat function

The presentation on Facebook is facilitated for free by
